

Product Spotlight: Bio-Diesel Blending Systems

Featuring:

Pump and Metering Skids for Bio Fuels, Feedstocks, Oils, Petrols, and Agrichemicals. Refinery, Truck, Rail Load Outs, Metering Skids, Industrial, Custody Transfer, or Marine... We do them All!

Above Ground or Below Ground, Economy Controls has a design for you.

Above Ground. Model ET3P-T550.

The Model ET3P-T550 Filters, Mixes, batches, and blends Bio from 0-100% and injects additives with a total output of 550 Gallons Per Minute.

Above Ground. Model ET3P-T60.

The Model ET3P-T60 Heats the Tank and Heats the plumbing, Filters, Mixes and Blends Bio to the Diesel as it is purchased from tank to vehicle.

A Prefab building is placed over the unit as shown.

Below ground package units are also available with custom sumps and engineering drawings with hundreds of installations nationwide.

All of our Bio Diesel Blenders feature proven and field tested components for ease of use and on-line accountability. Many of our customers are large truck stop chains that use these blenders on site to blend Bio Diesel to Diesel. Remotely manage blends with an IP assignable blender.

Single Pump, Meter and Control Packages are Available.

Model ET3P-32 features a 3 HP TEFC Explosion Proof motor, 32 gallon per minute Pump, Strainer, Meter, Drive and computer. This unit meets the needs of today's lower blend rates.

Shown left, **Model ET3P-52** is the same package yet the motor is a 5 HP and the pump is a 52 gallon per minute.

Smaller units are also available. Shown right is a 10 gallon per minute injector.
